PROJECT

PROJECTE-COMMERCE

- E-commerce site project is developed using PHP, CSS and JavaScript. Talking about the project, it has all the required essential features. This project has a user side where he/she can view product category and add products to cart and proceed for checkout whereas from administration side he/she can view sales, number of product, users, daily sales report, add product and categories. The user can also leave comments on each product if he/she wants. In this project, all the main functions are performed from the Admin side.

TRADING SOFTWARE

- Building a trading software using PHP involves creating a platform for users to buy and sell financial instruments like stocks, cryptocurrencies, forex, etc. Here's a high-level overview of what you might need.
